

Contents

1 Basic Terms of Railway Operation	1
1.1 Classification of Railway Systems.....	1
1.2 Basic Track Elements	3
1.3 Lineside Signals	14
1.4 Movements of Railway Vehicles	27
1.5 Modes of Operation.....	34
1.5.1 Signal-controlled Operation	34
1.5.2 Non Signal-controlled Operation.....	35
2 Dynamics of Train Movements.....	38
2.1 Tractive Effort.....	38
2.2 Resistances	39
2.2.1 Line Resistance	39
2.2.2 Train Resistance	43
2.3 Grade-Speed Diagram	44
2.4 Running Time Calculation.....	46
3 Spacing Trains.....	51
3.1 Theory of Train Separation.....	51
3.1.1 Train Separation in Relative Braking Distance.....	51
3.1.2 Train Separation in Absolute Braking Distance.....	53
3.1.3 Train Separation in Fixed Block Distance	54
3.2 Non Signal-controlled Operation.....	54
3.2.1 Timetable and Train Order (T & TO).....	55
3.2.2 Radio-Based Occupation Control Systems	56
3.2.2.1 Track Warrant Control (TWC)	56
3.2.2.2 Direct Traffic Control (DTC)	58

3.3	Signalled Fixed Block Operation.....	58
3.3.1	Basic Rules of Fixed Block Operation.....	59
3.3.2	Blocking Time and Headway Theory	60
3.3.3	Signals for Train Movements	67
3.3.3.1	Principles of Signalling	67
3.3.3.2	Signalling of Short Block Sections.....	73
3.4	Block Control Principles	76
3.4.1	Block Control by Telephone or Telegraph	77
3.4.2	Block Control by Line Block Systems.....	79
3.4.2.1	Manual Block.....	83
3.4.2.2	Automatic Block.....	89
3.4.2.3	Absolute Permissive Block (APB)	102
3.5	Automatic Train Protection	103
3.5.1	Intermittent ATP.....	104
3.5.2	Continuous ATP	107
3.5.3	European Train Control System (ETCS)	111
3.5.4	Chinese Train Control System (CTCS)	119
3.5.5	Positive Train Control (PTC).....	120
4	Interlocking Principles.....	122
4.1	Interlocking Routes	122
4.1.1	Interlocking between Points and Signals	125
4.1.2	Route Locking	128
4.1.3	Conflicting Routes.....	132
4.1.4	Flank Protection	133
4.1.5	Crosslock	138
4.1.6	Overlaps	139
4.1.7	Intermediate Points.....	143
4.1.8	Common Interlocking Areas.....	143
4.1.9	Command Interlocking.....	144
4.1.10	Track Clear Detection.....	145
4.1.11	Automatic Working of a Route.....	146
4.1.12	Handling Interlocking Failures	147
4.2	Signals in Interlocking Areas.....	149
4.2.1	Interlocking Signals for Train Movements	149

4.2.2	Shunting Signals.....	151
4.2.3	Signalling of Converging Terminal Tracks	154
4.3	Internal Logic of Interlocking Systems.....	156
4.3.1	Tabular Interlocking	156
4.3.1.1	Cascade Locking	156
4.3.1.2	Route-related Locking	158
4.3.2	Geographical Interlocking	160
4.4	Interlocking Systems	163
4.4.1	Mechanical Interlocking	163
4.4.2	Electric and Electro-pneumatic Interlocking	166
4.4.3	Relay Interlocking	168
4.4.4	Computer-based Interlocking	170
4.4.5	Interlocking Appliances for Hand Throw Points	171
4.5	Blocking Time in Interlocking Areas	174
5	Capacity Research.....	176
5.1	Dividing a Railway Network in Different Parts for Capacity Research.....	176
5.2	Basic Theory of Capacity Research.....	179
5.2.1	Waiting Time Diagram.....	178
5.2.2	Recommended Area of Traffic Flow	182
5.3	Research Methods	185
5.3.1	Capacity of Lines.....	189
5.3.1.1	Analytical Methods	189
5.3.1.2	Simulation	199
5.3.2	Capacity of Route Nodes.....	202
5.3.3	Capacity of Terminal Tracks	211
5.4	Improving Capacity	213
6	Scheduling.....	220
6.1	The Role of Scheduling in Traffic Control	220
6.2	Traffic Diagrams	221
6.3	Scheduled Running Time	223
6.4	Headways and Buffer Times	226

6.5	Cyclic Timetables.....	230
6.6	Scheduling Methods.....	233
6.6.1	Manual Scheduling.....	234
6.6.2	Computer-based Scheduling.....	236
6.7	Quality Assessment in Scheduling	239
7	Traffic Control.....	243
7.1	Traffic Control with Local Operators	243
7.1.1	Non Signal-controlled Lines.....	243
7.1.2	Signal-controlled Lines	244
7.1.3	Dispatcher Sheets	246
7.2	Centralised Traffic Control.....	247
7.3	Automation Technologies.....	248
7.3.1	Train Describers	249
7.3.2	Automatic Route Setting	252
7.3.3	Computer-based Dispatching.....	257
7.4	Control Centres	259
	Symbols in Diagrams.....	263
	Glossary	265
	References	282
	Index	284

Selected illustrations were provided by:

Bodo Schneider (4.43)

Holger Koetting (4.38)

Reinhard Schumacher (4.41)

Thomas White (4.35, 4.39, 4.40, 7.2)

All other illustrations by the author. For illustrations with screenshots of British control screens, the signalling simulation software SimSig was used with kind permission by the owner of www.simsig.co.uk.
